

ENERGY POLICY

Indofil Industries Limited strives to be the leading player in global agrochemical market, committed to reduce its energy consumption and costs to promote the long term environmental and economic sustainability of its operations. We endeavour to,

- Monitor operational energy efficiency at all levels and making efforts for continual improvement in energy performance.
- Control energy consumption by adopting energy efficient technologies, process and purchasing energy efficient products, equipment, and services.
- Continual improvement of energy performance & EnMS by setting annual energy efficiency targets and planning actions to achieve the same.
- Create awareness at all levels in the organization on conservation of energy and providing resources to achieve objectives and energy targets.
- Consider energy performance improvements in design and modification of our facilities, equipment system and processes.
- Comply with legal requirements and other applicable requirements by adopting best practices for energy sourcing, efficiency, usage, and consumption.
